RESULT 612
US-09-270-140A-65/C

is Sequence 65, Application US/09270140A

j Patent No. 654.941

j GENERAL INFORMATION:

j APPLICANT: Todd, Alison

APPLICANT: Gairs, Murray

j TITUE OF INVENTION: Caralytic Nucleic Acid base Diagnostic Methods

j TITUE OF INVENTION: Catalytic Nucleic Acid base Diagnostic Methods

j CURRENT APPLICATION NUMBER: US/09/270,140A

CURRENT FILING DATE: 1999-03-16

pRIOR FILING DATE: 1998-03-27

NUMBER OF SEQ ID NOS: 96

j SEQ ID NO 65

LENGTH: 18

## Sequence 65. Application US/09829855

## Sequence 65. Application US/09829855

## Patent No. 6613520

## GENERAL INFORMATION:

## APPLICANT: Matthew, Ashby N.

## TITLE OF INVENTION: Methods for the Survey and Genetic Analysis of Populations

## TITLE OF INVENTION: Methods for the Survey and Genetic Analysis of Populations

## CURRENT APPLICATION NUMBER: US/09/829,855

## CURRENT APPLICATION NUMBER: US/0/196063

## PRIOR FILING DATE: 2000-04-10

## PRIOR FILING DATE: 2000-04-11

## NUMBER OF SEQ ID NOS: 244

## SOFTWARE: PatentIn version 3.1

## SOFTWARE: PatentIn version 3.1

## LENGTH: 16
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       APPLICANT: Matthew, Ashby N.

Sequence 416, Application US/08435628

Patent No. 5817796

GENERAL INFORMATION:
APPLICANT: Stinchcomb, Dan T.
APPLICANT: Braper, Kenneth
APPLICANT: Manesh James
APPLICANT: Marvis, Thale
TITLE OF INVENTION: TREATMENT OF RESTENOSIS AND
TITLE OF INVENTION: CANCER USING RIBOZYMES
NUMBER OF SEQUENCES: 2627
CORRESPONDENCE ADDRESS:
ADDRESSEE: 633 West Fifth Street
STREET: 633 West Fifth Street
STREET: Suite 4700
CCMPUTER: IBM Compartible
OPERATING SYSTEM: IBM P.C. DOS 5.0
SOFTWARE: FastSeq Version 1.5
CURRENT APPLICATION DATA:
APPLICATION TOWBER: US/08/758,306
FILING DATE: December 3, 1996
CLASSIFICATION: 514
PRIOR APPLICATION: 514
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                COMPUTER: IBM Compatible

Patent No. 6346398
GENERAL INFORMATION:
APPLICANT: Pavco, Pamela
APPLICANT: Pavco, Pamela
APPLICANT: Escobedo, James
APPLICANT: Escobedo, James
APPLICANT: Escobedo, James
TITLE OF INVENTION: TREATHYTO OF DISEASES OR
TITLE OF INVENTION: TREATHYTO TO LEVELS
TITLE OF INVENTION: OF VASCULAR ENDOTHELIAL
TITLE OF INVENTION: OF VASCULAR ENDOTHELIAL
TITLE OF INVENTION: GROWTH FACTOR
NUMBER OF SEQUENCES: 8502
CORRESPONDENCE ADDRESS:
ADDRESSER: Lyon & Lyon
STREET: SUITE 4770
                        Sequence 138, Application US/09218207
Patent No. 6346381
GRERAL INFORMATION:
APPLICANT: Cohen, Daniel
APPLICANT: Blumenfeld, Marta
APPLICANT: Ilya, Chumakov
APPLICANT: Ilya, Chumakov
APPLICANT: Blumenfeld, Evdie
ITILE OF INVENTION: Prostate cancer gene
ITILE OF INVENTION: Prostate cancer gene
